Digital Accessibility Audits

Fast and flawless. Accessibility audits you can trust.

Thousands of organizations around the globe rely on Deque's (dee-cue) industry-leading, in-house expertise for Digital Accessibility Audits to understand where their issues lie and get guidance on how to fix them—fast.

Whether you're going through a procurement process, need to meet legal requirements, or just want to get better acquainted with your digital accessibility status, it's important to understand the current state of accessibility across your organization's digital properties. However, many teams often lack the tools, resources, or expertise to evaluate it on their own—that's why so many turn to Deque.

Deque's Digital Accessibility Audits deliver fast, expert-led assessments that show how well your digital experiences meet accessibility and compliance standards so you can take action quickly.

Digital Accessibility Audits use a proven methodology refined over 20+ years by Deque accessibility experts to ensure consistent, high-quality results that break down your accessibility issues. Deque combines automated and manual testing to uncover and document digital accessibility issues, providing a comprehensive view of your compliance status. You'll then receive a tailored results dashboard so you know where to start for the fastest, most meaningful improvements so you can build a more sustainable approach to accessibility.

Consistent insights, prioritized issues, and a clear path forward.

"The Deque audit really opened our minds and improved our understanding of accessibility. It was the first time we really understood just how much was needed and what we had to do."

-Simon Taghioff, Product Manager at Articulate

Results in weeks, not months

Get expert insights and detailed reports in just 1–2 weeks. Our unmatched in-house testing team and systematic approach ensure speed without sacrificing quality.

Findings you can trust

Benefit from our industry-leading team of W3C contributors and IAAP-certified experts, backed by a proven methodology tested in over 8,000 audits.

Easy-to-act-on results

Equip developers with clear priorities and tailored recommendations to quickly start remediation efforts. Reproduce, fix, rescan, and confirm updates with the axe DevTools Extension.

Get a clear picture of your digital accessibility posture

Deque's audits go beyond just identifying issues—they equip your team with the clarity and direction needed to take meaningful action.

Assess risk and establish a baseline of compliance	Whether you're new to accessibility or maintaining existing compliance, audits provide a clear snapshot of where you're at with digital accessibility. Deque experts have the unique ability to guide you through various legal processes with robust knowledge of laws like the ADA, EAA or Section 508, to make sure you are correctly addressing compliance needs and reducing risk.
Get a personalized readout across all digital properties	Go beyond web accessibility with assessment support for native mobile apps, digital platforms, documents, kiosks, and more. Deque helps you understand how all your digital content is performing—testing across a variety of standards, including WCAG, so issues don't get overlooked.
Empower and upskill your teams	Equip your teams with the skills to confidently remediate accessibility issues. Deque not only helps teams understand what's wrong and who it impacts, but also how to fix it. Additional educational resources explain the "why" behind each issue—so teams are always learning and improving.
Meet deadlines with confidence	When buyers or legal teams request an Accessibility Conformance Report (ACR) - using the Voluntary Product Accessibility Templates (VPATs), Deque delivers fast, comprehensive audits—providing the compliance evidence you need to win deals, reduce risk, and achieve compliance.
